

WHAT DOES MY CHILD NEED?

UNDURBA
STATE SCHOOL

Recommended iPad

A **new** iPad should last from year 3 to year 6. The recommended iPad for school is the latest device available. The iPad 9th generation with 64Gb is the latest available.

iPad 8 and 7 will also last several years.

Storage: Minimum storage is 32Gb. 64 or 128Gb is better (storage will need to be managed carefully and regularly on a 32Gb device)

Connectivity: WiFi only (No cellular devices allowed at school. No VPNs.) This is for safety purposes within the departmental WiFi network.

Minimum Device Requirements

The oldest device that students can use at school is an **iPad 5th Generation**. This iPad will be able to update to operating system iPad15, but may not be capable of further updates. The latest OS is needed to run the apps students need for school. iPads must have at least 32Gb of storage.

A sturdy case is essential.

Pencils and keyboards are optional
